

Maximizing Purchase Potential

Your modular fixturing investment will pay dividends over the course of your ownership, allowing you to fixture faster and with greater accuracy every time. All of our solutions are engineered to the highest quality standards, and Bluco is committed to making sure your investment fits your purchasing requirements, and that it lasts a lifetime.

YOUR PURCHASING OPTIONS

Ownership

For new customers, a simple credit application is submitted along with a purchase order and your system can be shipped in as little as 24 hours.

Short Term Rental

When your future needs are uncertain, our rental program allows you to get up and running with easy-to-manage rental agreements for as little as 6 months or as many as 12 months.

Long Term Rental

Our long term (18 month) rental option offers lower rental rates to further conserve cash flow. Both short and long term rentals include a rent-to-own option allowing you to apply a portion of the rent towards a purchase. Both programs also offer a buyout option, and allow you to extend your contract without penalty.

OUR COMMITMENT TO QUALITY

Limited Lifetime Manufacturing Warranty

Every system is backed by a lifetime manufacturing warranty that covers repair or replacement of standard catalog components.

Exchange Program

Your needs may change over time. Our exchange program allows you to exchange new or used standard catalog components for items of equal value for two years after purchase.

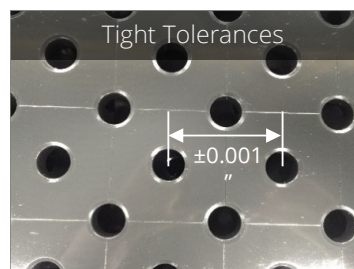

Lifetime Upgrades

Even after the first two years, you can keep your components up to date by upgrading to the newest versions of the standard components you've already purchased.

On-Site Training

We offer free, on-site training to help optimize the use of your fixturing system. Whether you need it today, or sometime down the road, our fixturing experts are here to deliver training that will help you make the most of your modular system.

WORLD-CLASS MODULAR SOLUTIONS
